

Rapid Prototyping Session Plan: Vibe Coding mit Figma Make

10-Minuten Session für große Online-Audienz | November 2025

Executive Summary

Diese Session zeigt, wie moderne Produktteams mit **Vibe Coding** und **Figma Make** von der Idee zum funktionsfähigen Prototyp in unter 5 Minuten kommen. Basierend auf aktueller Marktforschung (November 2025) adressiert die Session kritische Pain Points wie ineffiziente Design-Developer-Handoffs (65% verlieren 4-8 Std/Woche)^{[1] [2]} und Time-to-Market-Druck (40% schnellere Lieferung erforderlich)^{[3] [4]}.

1. Kontext & Marktlage (November 2025)

Aktuelle Trends

- **AI-gestützte Design-Tools:** Beschleunigen Prototyping um 70-80%^{[5] [6]}
- **Figma Make Launch:** Seit Mai 2025 verfügbar als Prompt-to-Code Tool^{[7] [8]}
- **Vibe Coding Adoption:** Natural language programming ohne Coding-Kenntnisse^{[9] [10]}
- **AI Integration:** 73% der Teams nutzen AI, aber 45% struggeln mit Code-Reliability^{[11] [12]}

Identifizierte Pain Points

1. **Time-to-Market Druck:** Teams müssen 40% schneller liefern^{[13] [3]}
2. **Design-Developer Handoff:** 65% verlieren 4-8 Stunden/Woche bei Abstimmung^{[2] [14]}
3. **Stakeholder Alignment:** Unclear requirements führen zu Projektverzögerungen^{[15] [16]}
4. **Prototyping Bottleneck:** Static Designs können Interaktionen nicht zeigen^{[6] [8]}
5. **Technical Feasibility:** Designs sind oft nicht umsetzbar^{[14] [17]}
6. **Resource Constraints:** Limited budget bei steigendem Innovationsdruck^{[4] [18]}

2. Empfohlenes Demo-Beispiel

Theme: Project Management Dashboard

Warum dieses Beispiel optimal ist:

- ✓ **Universell verständlich:** Jeder nutzt Projektmanagement-Tools
- ✓ **Multiple Pain Points:** Zeigt Stakeholder Alignment + Quick Iteration
- ✓ **Aktuelle Relevanz:** Remote/Hybrid Work braucht bessere Collaboration Tools
- ✓ **Visually Impressive:** In 10 Minuten machbar und beeindruckend
- ✓ **Real-world Applicability:** Sofort einsetzbar für Teilnehmer

Alternative: Client Onboarding Flow für SaaS – zeigt Time-to-Market Improvement

3. Session-Struktur (10 Minuten)

Phase 1: HOOK (0:00 - 0:30)

Ziel: Problem etablieren, Attention grabben

Content:

- Startfrage: "Wer von euch hat schon mal Tage auf einen Prototyp gewartet, nur um dann festzustellen, dass Stakeholder etwas anderes wollten?"
- **Shocking Stat:** "65% der Designer verlieren 4-8 Stunden pro Woche nur mit Design-Erklärungen"^[2]
- **Promise:** "In den nächsten 9 Minuten zeige ich euch, wie ihr von Idee zu funktionierendem Prototyp in unter 5 Minuten kommt"

Engagement: Live Poll starten: "Wie lange dauert euer durchschnittlicher Prototyping-Prozess?"

Phase 2: CONTEXT (0:30 - 1:30)

Ziel: Why Now? – Den perfekten Zeitpunkt etablieren

Key Messages:

- **Figma Make Launch** (Mai 2025): Prompt-to-prototype Revolution^{[7] [8]}
- **AI Adoption Reality:** 73% nutzen AI, aber viele struggeln mit praktischer Anwendung^[11]
- **Market Reality:** 40% schnellerer Time-to-Market erforderlich^[3]
- **The Gap:** Teams brauchen schnellere Validation, nicht mehr Tools

Visual: Timeline Graphic – Traditional Prototyping vs. AI-powered Prototyping

Phase 3: SOLUTION (1:30 - 3:30)

Ziel: Vibe Coding & Figma Make als Lösung positionieren

Key Concepts:

1. Was ist Vibe Coding?

- Natural language → Funktionaler Prototyp
- Demokratisierung von Prototyping
- Keine Coding-Kenntnisse erforderlich^{[9] [10]}

2. Figma Make Superpowers:

- AI versteht Design Intent
- Generiert Production-ready Code (React, Tailwind, etc.)^{[6] [8]}
- Point-and-Prompt Editing^{[8] [19]}

3. Der Workflow:

- Prompt → Iterate → Test → Handoff (alles in Minuten)
- 70-80% schnellere Prototype Creation^{[5] [6]}

Benefits Highlight:

- Live Data Integration möglich^{[20] [19]}
- Responsive by default
- Production-ready code output^{[6] [8]}

Engagement: Quick Quiz im Chat: "Was glaubt ihr, wie viele Prompts braucht man für einen guten Prototyp?"

Phase 4: LIVE DEMO (3:30 - 8:30)

Szenario: Team needs quick Dashboard to align stakeholders on project status

Demo Flow (5 Minuten)

Step 1 (30 Sekunden): Initial Prompt

```
Erstelle ein Project Dashboard mit Task Overview,  
Team Member Status, und Timeline Chart.  
Modern, clean design mit data visualization
```

Explain: "Klarheit im Prompt = besseres Ergebnis"^[9] ^[6]

Step 2 (90 Sekunden): Erste Iteration Reviewen

- Was AI gut macht: Structure, Layout, Components
- Live Preview zeigen
- *Explain:* "AI generiert funktionale Basis in Sekunden"^[7] ^[8]

Step 3 (60 Sekunden): Point-and-Prompt Refinement

Refinement 1:

```
[Select Chart] Make this chart responsive and  
add filter dropdown for team members
```

Refinement 2:

```
[Select Task Cards] Add smooth hover animation  
and status color coding
```

Explain: "Iterative Verbesserung durch präzise, kleine Prompts"^[9] ^[21]

Step 4 (30 Sekunden): Test im Browser

- Responsive behavior zeigen
- Interactions demonstrieren
- Live feeling vermitteln
- *Explain:* "Sofort testbar für Stakeholder Feedback"^[20] ^[15]

Step 5 (30 Sekunden): Code Export

- React + Tailwind CSS Code zeigen
- *Explain:* "Developer Handoff ohne Friction"^[6] ^[2]

Engagement während Demo:

- Live Reactions (Emoji) encouragen
- Prompt Challenge im Chat: "Schreibt euren eigenen Dashboard-Prompt!"

Phase 5: BEST PRACTICES (8:30 - 9:30)

Ziel: Actionable Takeaways liefern

Die 6 Essential Practices

Practice	Quick Tip	Impact	Time Save
1. Start with Clarity	PRD oder Wireframe first	Bessere AI outputs	30%
2. Iterate Small	3-5 kleine Prompts statt 1 großer	Weniger Verwirrung	40%
3. Use Real Data	JSON/CSV für realistic prototypes	Stakeholder sehen Reality	25%
4. Test Continuously	Nach jeder Iteration testen	Früher Bugs catchen	35%
5. Document Prompts	Prompt history für Team	Reusable patterns	20%
6. Include Devs Early	Show während Development	Eliminate handoff friction	50%

Common Pitfalls (zu vermeiden)

- ✗ Zu komplexe erste Prompts
- ✗ Security Considerations in Prompts vergessen^[9]
- ✗ Mobile Responsiveness nicht spezifizieren^[6]
- ✗ Keine Version History führen^[21]

Engagement: Best Practice Voting – "Welcher Tipp ist für euch am wertvollsten?"

Phase 6: WRAP-UP & CTA (9:30 - 10:00)

Key Takeaways:

1. **Vibe Coding** demokratisiert Prototyping für alle Skill-Levels
2. **Figma Make** = von Idee zu Code in Minuten, nicht Tagen
3. **Best Practices** = Clarity, Iteration, Testing
4. **Impact** = 70% Zeit gespart + besseres Stakeholder Alignment^[5] ^[15]

Call to Action:

- "Probiert es heute aus: figma.com/make"
- Resources teilen: Template, Guide, Community

Closing Line:

"Von 'Ich habe eine Idee' zu 'Hier ist der funktionierende Prototyp' in der Zeit eines Kaffees ☕"

Final Engagement: 2-3 Rapid-fire Q&A aus Chat

4. Engagement-Strategie für Online-Format

Pre-Session (5 Minuten vor Start)

- Warm-up Poll: "Was ist euer größter Prototyping Pain Point?"
- Chat aktivieren und Erwartungen abholen
- **Expected Response:** 60-70% Participation

During Session

Timing	Technik	Tool	Zweck	Expected Rate
0-2 min	Interactive Question + Stats	Chat + Screen	Attention grabben	80-90%
4-6 min	Prompt Challenge	Chat	Active participation	30-40%
6-8 min	Live Reactions	Platform Emoji	Energy hoch halten	70-80%
9-10 min	Q&A + Resources	Chat + Links	Action + Follow-up	40-50%

Presentation Dynamics

- **Energetic Pacing:** Keine dead air, konstante Bewegung
- **Visual-First:** Show don't tell – mehr Demo, weniger Slides
- **Voice Modulation:** Vary tone für emphasis und Engagement
- **Camera On** (wenn möglich): Persönliche Connection aufbauen

5. Technical Setup Checklist

Vor der Session vorbereiten:

- ✓ **Figma Make Account** mit vorbereitetem Dashboard-Template
- ✓ **Browser Tabs ready:** Figma Make, Beispiel-Dashboard, Code Export View
- ✓ **Backup Demo:** Pre-recorded Video falls Live fehlschlägt
- ✓ **Dual Screen Setup:** Präsentation + Chat monitoring
- ✓ **Co-Moderator briefed** für Chat engagement
- ✓ **Engagement Polls pre-loaded** (Slido/Mentimeter)
- ✓ **Resources ready:** Links, PDF Guide, Template zum Teilen

Technical Requirements:

- ✓ Fast Internet (min. 50 Mbps upload)
- ✓ Professional Audio (USB Mic oder Headset)
- ✓ Quiet Environment (Background noise check)
- ✓ Lighting Check (wenn Camera on)
- ✓ Platform Features getestet (Screen share, Reactions, Polls)

6. Success Metrics & Follow-up

Session Success Metrics

- **Engagement Rate:** Target 60%+ active participation
- **Question Quality:** Specific, actionable questions im Chat
- **Post-Session Action:** Link clicks, Template downloads
- **Feedback Score:** Aim for 4.5+ / 5.0

Follow-up Resources zum Teilen

1. **Session Recording** + Slides
2. **Figma Make Template** (vorgefertigt)
3. **Best Practices PDF** (1-Page)
4. **Prompt Library** (Community-sourced)
5. **Office Hours** für weitere Fragen

7. Key Statistics Reference

Impact Statistics (zum Emphasieren)

- ☐ **70-80%** schnellere Prototype Creation mit Figma Make^[5] ^[6]
- ☐ **40%** Reduktion der Prototyping Zyklen durch AI-Integration^[22] ^[23]
- ☐ **25%** schnellerer Project completion mit cloud-based collaboration^[22]

Pain Point Statistics (zum Validieren)

- ☹ **65%** der Designer verlieren 4-8 Stunden/Woche bei Design-Developer Handoff^[2]
- ☹ **66%** der Designer verbringen 4-8 Std/Woche mit Layout-Erklärungen^[2]
- ☹ **73%** der Teams nutzen AI, aber **45%** struggeln mit Code Reliability^[11] ^[12]

Opportunity Statistics (zum Motivieren)

- ☐ Teams müssen **40%** schneller Time-to-Market erreichen^[13] ^[3]
- ☐ **20%** Produktivitätssteigerung durch systematisches Debt Management^[11]
- ☐ **35%** der Product Ideas kommen von Customer Feature Requests^[24]

8. Presenter Notes

Vor der Session

1. **Practice Demo 2-3x**: Timing perfektionieren
2. **Test alle Tech**: Screen share, Audio, Platform features
3. **Backup Plan ready**: Pre-recorded demo as fallback
4. **Co-Moderator briefing**: Chat monitoring, Poll timing
5. **Energy Check**: Enthusiasmus ist ansteckend

Während der Session

- **Pace Management**: 10 Minuten sind schnell – tight timing
- **Watch Chat**: Co-Moderator gibt Signals für wichtige Questions
- **Energy High**: Enthusiasm über Features zeigen
- **Authenticity**: Ehrlich über Limitations (AI ist nicht perfekt)
- **Relatability**: "Ich war auch skeptisch am Anfang..."

Nach der Session

- **Resources sofort teilen:** Links, Templates, PDFs
- **Questions sammeln:** Follow-up Content-Ideen
- **Feedback einholen:** Quick survey (2-3 Fragen)
- **Community nurturing:** Office Hours, Slack/Discord Channel

9. Anpassungen für verschiedene Audiences

Für Designer-heavy Audience

- Mehr Emphasis auf: Design-to-Code Quality, Figma Integration
- Demo zeigen: Component Libraries, Design System Integration
- Best Practices Focus: Maintaining design consistency

Für Developer-heavy Audience

- Mehr Emphasis auf: Code Quality, Framework Support, API Integration
- Demo zeigen: Code Export, Technical Implementation
- Best Practices Focus: Code review processes, Testing

Für Product Manager Audience

- Mehr Emphasis auf: Stakeholder Alignment, Time-to-Market
- Demo zeigen: Quick validation, Feedback loops
- Best Practices Focus: Decision-making speed, Resource optimization

Für Mixed Audience (empfohlen)

- Balanced Approach: Design + Development + Business Value
- Demo zeigt alle Aspekte
- Best Practices decken gesamten Workflow ab

10. Conclusion & Next Steps

Diese Session vermittelt in 10 Minuten die Power von Vibe Coding mit Figma Make als Antwort auf die dringendsten Prototyping-Challenges 2025. Der Fokus liegt auf:

1. **Practical Demonstration:** Live Demo schlägt theoretische Erklärungen
2. **Actionable Takeaways:** 6 Best Practices sofort anwendbar
3. **High Engagement:** Multiple Touchpoints halten Audience involviert
4. **Real Impact:** Konkrete Time-Savings und Efficiency-Gains

Success hängt ab von:

- Technischer Vorbereitung (Practice makes perfect)
- Energetic Delivery (Enthusiasm ist key)
- Audience Engagement (Interaction maximieren)
- Clear Value Proposition (Pain Points → Solution → Action)

Viel Erfolg! 🍀
